SREEKUMAR KALLINGAPURAM SURESH

Thrissur, India | sreeku1993@gmail.com | +91 9567197101
Portfolio: https://sreeku1993.github.io/sreekumar.github.io/

Professional Summary

Senior AI Engineer with an MSc in Artificial Intelligence and 4+ years of experience across software engineering, QA automation, and AI application development. Experienced in building Agentic AI systems, LLM-powered applications, RAG pipelines, AI assistants, and workflow automation using Python, FastAPI, LangGraph, MCP, LangChain, LangSmith, and Google Gemini. Skilled in backend engineering, hybrid retrieval, AI evaluation, observability, and production-oriented application development. Currently contributing to the Unbounce landing-page builder project at Techjays, using Claude Code to support AI-assisted software development across codebase exploration, implementation planning, code generation, test generation, debugging, and code review. Interested in agentic AI-enabled SDLC workflows, reusable Claude Code skills, and plugin-based engineering automation.

Technical Skills

Backend & Application Development: Python, FastAPI, Flask, REST APIs, Next.js, TypeScript, Java, JavaScript

Agentic AI & LLM Applications: Agentic AI, LangGraph, Model Context Protocol (MCP), LangChain, Google Gemini, LLMs, tool calling, multi-agent workflows, conversational AI, prompt engineering

AI-Assisted Software Development: Claude Code, AI-assisted SDLC, codebase exploration, implementation planning, code generation, test generation, debugging, code review support, reusable skills and plugin-based workflows

RAG & AI Evaluation: RAG, semantic search, embeddings, vector search, hybrid retrieval, BM25, Reciprocal Rank Fusion (RRF), reranking, RAGAS, LLM-as-a-Judge, LangSmith, SentenceTransformers, OCR, PDF processing

Machine Learning & Computer Vision: PyTorch, TensorFlow, Scikit-learn, OpenCV, YOLO

Databases & Data Processing: PostgreSQL, MySQL, SQL Server, Supabase, Pandas, data preprocessing

Cloud & DevOps: Docker, Kubernetes, GCP Cloud Run, Vercel, Git, Jenkins, CI/CD, Render

Automation & Testing: Python, Pytest, Selenium WebDriver, Cypress, Playwright, TestCafe, Appium, Postman, API testing, UI automation, AI system testing

Tools & Platforms: Claude Code, VS Code, Jira, Confluence, Xray, Google Apps Script, Android Studio

Professional Experience

Senior AI Engineer

Techjays | Client: Unbounce | Jul 2026 – Present

- Onboarding to the Unbounce landing-page builder product, which supports visual drag-and-drop editing and prompt-based page creation.
- Learning the existing product architecture, codebase conventions, feature workflows, and testing practices to deliver enhancements within an established application.
- Using Claude Code as part of an AI-assisted software development lifecycle for codebase exploration, implementation planning, code generation, debugging, test generation, and code review support.
- Developing skills in Claude Code workflows, including reusable skills and plugin-based approaches to standardize repeatable engineering tasks and improve developer productivity.
- Applying an agentic approach to development tasks through task decomposition, tool use, iterative implementation, verification, and human review.
- Collaborating through Git-based branches, pull requests, code reviews, and testing workflows.

Freelance AI Engineer (AI Consulting & Product Development)

Independent | Thrissur, India | Jan 2026 – Present

- Designing and developing AI applications across healthcare, legal research, and career intelligence use cases.
- Building agentic systems and workflow orchestration using LangGraph, MCP, FastAPI, LangChain, and modern LLM frameworks.
- Developing RAG applications with hybrid retrieval, vector databases, query-aware routing, and retrieval optimization.
- Implementing evaluation and observability practices using LangSmith, RAGAS, and LLM-as-a-Judge approaches.
- Delivering end-to-end application components spanning architecture, backend services, integrations, evaluation, and deployment.

Technical Team Leader

Planthood | London, UK | May 2024 – Aug 2025

- Led production planning, task allocation, staff coordination, and dispatch workflows across kitchen operations.
- Developed and integrated an Android-based operational tracking application connected to Google Sheets for task, staff, and workflow visibility.
- Automated data capture and routine operational processes to reduce manual coordination and improve operational visibility.
- Used production and operations data to support reporting, KPI tracking, and management summaries.
- Coordinated cross-functional teams to identify bottlenecks and improve day-to-day workflow efficiency.

Programmer Analyst

Cognizant | Kochi, India | May 2021 – Dec 2021

- Contributed to testing and validation of an AI-based voice biometrics system, covering functional behavior and user workflows.
- Performed API validation and backend data verification using Postman and SQL.
- Supported e-commerce testing, including API automation and functional/regression validation.
- Collaborated with developers and analysts to troubleshoot issues, verify fixes, and support stable releases.

Test Engineer

Infosys Ltd. | Mysore, India | Aug 2018 – May 2021

- Developed and maintained automation for enterprise applications, including mobile testing across Android and iOS.
- Validated internal travel-management workflows covering itinerary planning, travel requests, and approval processes.
- Performed e-commerce API automation and web UI testing using TestCafe.
- Supported end-to-end, regression, and release testing, defect tracking, and collaboration within Agile teams.

Key AI Projects

AI-Powered Clinic Assistant | Agentic AI

- Developing a healthcare assistant using FastAPI, LangGraph, MCP, and PostgreSQL/Supabase for patient and appointment workflows.
- Implementing conversational context, tool-calling workflows, appointment availability checks, booking, rescheduling, cancellation, and document access.
- Using LangSmith for workflow tracing, debugging, and evaluation.

AI Legal Assistant | Advanced RAG

- Built a legal research assistant using Groq (Llama 3.3 70B), Qdrant, BM25, semantic retrieval, and Reciprocal Rank Fusion.
- Indexed over 32,000 legal chunks and implemented query-aware retrieval for Indian legal references.
- Used LangSmith for tracing and RAGAS metrics for faithfulness, answer relevancy, context precision, and context recall; deployed a Next.js/TypeScript application on Vercel.

Career Intelligence Platform | GenAI SaaS

- Developed a career intelligence platform using Google Gemini to analyze resumes, match roles, identify skill gaps, and generate personalized learning roadmaps.
- Built full-stack application workflows with Next.js, Supabase, FastAPI, and Vercel.

Certifications

AI Capabilities and Limitations, Introduction to Subagents, AI Fluency Framework & Foundations, Claude in Amazon Bedrock, Claude on Google Cloud, Introduction to Claude Cowork, Introduction to Model Context Protocol, Introduction to Agent Skills, Building with the Claude API, Claude Platform 101, Claude Code in Action, Claude Code 101. Anthropic, July 2026.

Education

- MSc in Artificial Intelligence — University of East London | Jan 2022 – May 2023
- Master of Computer Applications — Anna University | Aug 2015 – Jun 2018
- Bachelor of Computer Applications — Christ College | Aug 2011 – Aug 2014
